

# GREEN WALL

Also known as living walls and vertical gardens, green walls provide a practical and aesthetically pleasing way to partition offices, divide seating space in bars and restaurants, screen private areas or simply beautify any commercial interior. Our custom-made green walls can equally serve as features in homes and retail premises.

All our green walls are made to meet the individual needs of customers. We work closely with interior landscape designers and architects to create green walls that look just right in the designated space. Not only that, our green walls are configured to ensure healthy growth of the plants chosen for the particular environment.
