

# PARAMOUNT TILT BIN

Surface fixed in tilt position

The robust Paramount Tilt Bin is built to last. It is ideal for use in public parks and reserves, shopping centre car parks and other places where a heavy-duty litter receptacle is needed.

With its trouble-free tilt action and slam lock, the Paramount Tilt Bin can be emptied and securely reset quickly and easily, satisfying parks staff and Worksafe requirements alike.

The Paramount Tilt Bin is made around a strong galvanised mild steel frame, its liner of the same material fitted with a handle for ease of lifting. There is also a Corten (weathering) steel frame option.

Slats are available in saligna hardwood or recycled plastic in a range of colours. Also available with recycled-plastic sheet wrapper. All on a sturdy mount and capped with stainless steel or Corten lid.

The Paramount is a long-life, low-maintenance litter bin option for public spaces everywhere.

With recycled plastic slats

Corten steelwork & fitted back-to-back, Wellington south coast

Set in ground as a pair, Harcourt Park, Upper Hutt
