

STREETSCAPE PLANTERS

Metal Art Limited
Street & Park Furniture

One of several sheet-steel Streetscape Planters in the Nelson CBD, finished with a durable wet spray.

Large planters destined for Blenheim. Made using Corten weathering steel for a naturally rusting effect.

Our sheet metal fabrication capabilities combined with distributorships in moulded-plastic commercial planters puts us at the leading edge of streetscape planters for central business districts, shopping malls and other built-up locations.

Streetscape Planters are generally customised to the design specifications of urban planners. Using our knowledge of container plant care and the hardware that works best in different environments, we can assist in the design process to produce the Streetscape Planter you require from a selection of suitable materials and with the finish of your choice.

The planters at left are located on Main Street, Upper Hutt, made using vitex hardwood and sheet-steel on a heavy-duty galvanised mild-steel frame.
