

ECO POD

RECYCLED PLASTIC

With the Eco Pod, our designers have created a new look in casual bench seating.

When used in sets, the Short Eco Pod can be nested for a contiguous setting, or separated for single seating as the situation demands. The Long Eco Pod, designed as a three or four seater, is reversible and adaptable in the same way. .

The Eco Pod is easily transportable, and makes an outdoor feature that is comfortable and cost-effective. Ideal for children's play areas, kindergartens and primary schools.

What's more, the Eco Pod is good for the environment. Replas recycled plastic will not split, rot or attract organic growth, and never needs painting.
