

METALLION BIN

CT38-80 Bin—Stainless steel

Where volumes of litter exceed the capacity of waste paper bins, there's a Metallion Bin to provide the solution. It's a space-saving, functional yet stylish container for interior use, with versions also available for outdoors.

Metallion Bins are available in two material options:

1. Electro-galvanised steel body with aluminium lid & base
2. Brushed stainless steel - complete unit, suitable for exterior use.

An alternative top can be supplied for use of the Metallion Bin as a ticket receptacle.

All models also available with provision for combination ash and litter disposal, on enquiry.

Code	Diameter	Height	Capacity
	mm	mm	litres
