

BROLGA BOLLARD

RECYCLED PLASTIC

New to the range of Replas recycled plastic bollards, the Brolga is something different. The bollard's 200mm face allows plenty of room for instructional signage, reflectors or decoration, and its angled top adds a further touch of style. The Brolga is also available with a flat top for use as a functional and long-lasting signpost.

Brolga bollards are easy to install, and can stand alone or be linked by pipe. Holes at the bollard base ensure secure fixing in ground.

Replas recycled plastic bollards will not split, rot or crack, and never need painting.
