

# COTTAPOT PLANTERS

Our Cottapot indoor/outdoor plant containers are made from recyclable polyethylene (LDPE) plastic, a low volatile organic compound that is UV resistant for a long lifespan, while being easy on the environment. These light and durable planters can be produced in any colour from an extensive palette, in a range of innovative and trendy styles from the drawing boards of award-winning designers. Most feature an irrigation system for easy plant maintenance and protection.

Cottapot Planters come with a ten-year manufacturer's warranty on all polyethylene components. They are 100% recyclable.

## Colours

Here is a sample of our Cottapot colours. The full range can be found on our website.

Note: All colours shown are for reference only. For accuracy, please contact us to obtain colour swatches.

## Care + Maintenance

Clean surfaces with a damp soft cloth or sponge using lukewarm water and a neutral dishwashing detergent. To remove stubborn marks, use a foaming product such as *Simple Green* and a soft scrubbing brush. Avoid strong detergents that contain bleach, acid or have an abrasive effect.
