

CUBIS

The tapered CUBIS planter adds shape and style to any space, either stand alone or placed in sets. Available in a size to suit and constructed of 1mm zinc-plated steel, the CUBIS comes with all joints silicone sealed and powder coated to your colour of choice.

Fitted mulch plates with 300mm diameter hole are standard, or plant support can be configured to meet requirements. As with all our steel planters, optional waterproofing enables the CUBIS to be used with confidence on a wide variety of surfaces. Listed at right are some indicative sizes.
