

# MARITIME BOLLARD

## RECYCLED PLASTIC

The Replas Maritime bollard is formed from 100% recycled plastic for an extended, low maintenance lifetime in marine and other harsh environments. The bollard's distinctly nautical design makes it ideal for esplanades and seaside locations, but it fits in anywhere its elegant shape suits the situation.

The Maritime bollard looks great when combined with pipe or chain for a fence effect. It is available in black, is surface mounted and stands 960mm high. Replas recycled plastic bollards will not split, rot or crack, and never need painting.

### WEIGHT

9.5 kg
