

PLANK SIGN RECYCLED PLASTIC

Plank Sign (single 200mm plank)

The highly visible Replas Plank Sign is used in parks, forest reserves, schools and sports grounds to identify location, with plenty of space available for general information.

Support posts are sturdy 125mm square bollards, with planks available at 200x40mm or 400x40mm to allow flexibility of design to suit the purpose. Standard plank length is 1.8 metres, with shorter lengths available as required for the location.

The Plank Sign is completed with text routed into the plastic and highlighted with a high quality paint, with reverse-routed acrylic plaques as required, mounted flush into the surface.

Replas Plank Signs come in green, blue and grey, with black posts also available.
