

REPLAS PROFILES

RECYCLED PLASTIC

Metal Art Limited
Street & Park Furniture

Replas profiles come in a wide range of sizes and colours. With numerous commercial and domestic applications, these recycled plastic lengths are the ideal alternative to treated timber or hardwood. Turning waste plastic into a usable product that will outlast timber by years, recycled plastic profiles are cost-effective, and great for the environment in every respect.

Before using recycled plastic in construction projects, it is important to read the Replas Product Properties document available on our website.

<u>Sizes</u>	<u>Lengths</u>	<u>Colours</u>
