

SEAVIEW SEAT

With its robust mild steel hot-dip galvanised frame and a choice of either vitex or tonka 65mm x 65mm timber slats that will withstand the elements and stay looking good for years to come, the Seaview Seat is made to last.

The Seaview Seat is normally installed in-ground, but is available for surface mounting if required. It has an overall length of 1880mm and is ideal for urban areas, parks and reserves. It comes with an oil stain applied to the hardwood slats.
