

# SPEEDY REMOVABLE BOLLARD

**Metal Art Limited**  
Street & Park Furniture

The Speedy Removable Bollard is so-named because it is quickly and easily removed when access is needed — with a twist and a lift.

At 800 mm above ground and just 9.2 kg, this is a light item as removable bollards go. So lifting it out of its 200 mm-deep sleeve is a simple task. And unlike most removable bollards, there is no hinging flap and cover plate to present a trip hazard.

This bollard is specifically designed to protect pedestrian zones that periodically require vehicle access. It is ideal for larger venues where heavy equipment pack-ins require transportation right up to the stage or court-side door.

Speedy Bollards were chosen for the upgrade at Walter Nash Centre, Lower Hutt
