

# METALLION LIT BOLLARD

Metal Art Limited  
Street & Park Furniture

If the street and park lighting is dim or distant, these bollards will show the way. Lit Bollards are commonly used to illuminate public parks and walkways, outdoor seating areas and landscape features. They add safety and security to alleyways and other pedestrian thoroughfares.

Our standard Metallion Lit bollard is 1100mm high x 165mm diameter, with a fitted 32 watt compact fluorescent bulb that emits through a 25mm clear acrylic layer. Coloured 3mm acrylic inserts are also available if a distinctive lighting feature is sought. The bollard body and cap can be powder coated in any colour of choice.
